The Perfect Decor

Bringing the outside into your home is the best decision you can make. The lush greenery of houseplants upscales your interior design while providing a (scientifically proven) form of happiness and a fun hobby.

Urban root ensures that the plants you purchase are in top-tier condition. No more rootbound, root-rotted or wilting leaves. We're looking at you Home Depot.

Each plant already comes purchased with a decorative pot, with the opportunity to swap, to make sure that all your needs are resolved in this one stop shop. Have a pot you feel doesn't fit into your home anymore? Ask an associate about our exchange program!

Care & Advice

Have you ever purchased a houseplant only for it to wilt the second you got it home?

Every urban root location provides personal plant care service and advice. Located in the back of the store, individuals can find the service desk where they can make appointments to assess the health of their plant and also offer solutions in terms of fertilizer, the appropriate plant food, soil, humidity, misters and more.

Each location is equipped with the right remedy to help individuals help their plants completely in-house. You can also visit our website to ship directly to your home for a solution without ever walking out your front door.

Plant Fun Facts

- ◆ Plants are happiest when listening to classical music, particularly strings.
- ◆ It's easier to keep a plant in a nursery pot than repot it directly into a decorative pot. Trust us!
- ◆ They purify the air directly in its surroundings.
- ◆ Plants also reduce noise pollution. Say hello to less noise!
- ◆ Plants are known to decrease your stress levels.
